

Presents the Launch of the
National STEM School Leadership Network

The STEM education landscape is evolving rapidly as more districts embrace STEM as an innovative platform for reform. In response to the proliferation of STEM schools, the National STEM School Leadership Network was conceived to support generative thinking among school leaders, support their growth and development in STEM and to enable their talent and expertise to proliferate throughout the country. This network is critical for sustainable collaboration and exchange of best practices among STEM school leaders.

We hope to formalize its inception with an inaugural convening:

SCHOOL OF THE ART INSTITUTE

Chicago, Illinois

March 21, 2012 - Evening Welcome Reception

March 22, 2012 - Full Day Convening

The National STEM School Leadership Network will help members:

- Strengthen knowledge and understanding of issues related to the distinct role of STEM school leadership
- Engage leaders in networking sessions to access national resources and research-based practices that are currently being utilized nationally
- Provide an opportunity for school leaders to participate in high quality professional development within a STEM learning community
- Ultimately, the network will enable the rapid transmission of innovation throughout the country

In an effort to gauge interest in such an event...please email Angie Kastning at angiekastning@tiesteach.org if you would like to learn more.

We hope to hear from you - and look forward to creating a network that will further advance the innovative educational landscape of our nation!
